

Continuous Development means
SUPREME STABILIZER LINKS are equipped
with the best materials to provide exceptional
vehicle handling and extended part life.

X-Factor Polyurethane materials
provide advantages which cannot be
matched by anything else on the market

On specific **X-Factor** designated skus,
THE SUPREME STABILIZER LINK PROGRAM
will contain new upgraded Polyurethane bushing
material, used exclusively by Mevotech, which
provide enhanced product benefits that earn
the **X-Factor** designation.

Polyurethane material provides:

- 1) Better Elasticity
(retains original form better than rubber and allows for a better fit)
- 2) Better resistance to abrasion
(does not wear like rubber, which provides increased part life)
- 3) Better Resistance to chemical absorption
(Salt, Oil and other contaminants have no effect on material rigidity)

- **New packaging**
- **New design**

Less space for the same part.
Increase your warehouse efficiency.

Start stocking **SUPREME STABILIZER LINKS**
and watch your Chassis business grow!
