SINTERED METAL GREASEABLE BEARINGS

TTX patented sintered metal greasable bearings provide extra endurance and durability to get more life out of parts, when compared to OE-style plastic bearings. (US Patent N° 9296271 & 10527089)

TTX

Sintered metal upper and lower bearings

OE-STYLE

Plastic bearing

HIGH STRENGTH LOCKING BOOT

TTX patented high strength multi-lip locking boot is designed as a permanent and superior method of protection against contamination. (US Patent N° 9771971)

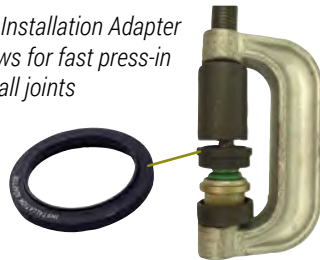

The TTX Boot is mechanically locked to its housing, keeping grease in and contaminants out.

EASY TO INSTALL

TTX parts are easy to install with hardware and install aids included in-box, reducing total service time and cost.

Our Installation Adapter allows for fast press-in of ball joints

Bootstaller™ makes fitting boots trouble-free in small spaces

Coated Grade 12 and 12.9 hardware is included with all TTX parts

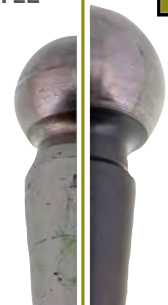

MORE MATERIAL

TTX parts are engineered to last. Application-specific material is added into critical areas on ball joints, control arms, stabilizer links and tie rods, which reduces flex and minimizes loading to prolong life.

OE-STYLE
