

Grease Fitting Location and Improved Ease of Access on Various Solid Axle Applications

Brand	Original Grade/Supreme/TTX	Product	Ball Joint	Date	March 2021
Part Number(s)	GK8195T/MK8195T/TXMS50569				

As a result of differing clearance tolerances between the U-Joint yoke assembly and the bottom of the upper ball joint housing on some applications, Mevotech ball joints with the following part numbers (GK8195T/MK8195T/TXMS50569) feature a SAE compliant grease fitting which is located on the side of the ball joint housing.

The grease fitting has been located to the side of the ball joint housing to prevent possible interference with the yoke assembly as it rotates. Furthermore, this location improves both ease of installation and ease of access for the Professional Technician during a future lubrication service.
