Past Co-op Student Testimonials

Gregory Schneider

Engineering Intern

"I learned a lot and enjoyed that it was very hands-on. I could always inspect parts and designs to learn from them. With my passion for cars, this co-op program was very beneficial for my future career goals. It is great to know that some contract placements transitioned to become full time employees."

Kai Zheng

Engineering Intern

"Being able to work directly with the Automotive parts helped a lot in my practical knowledge. Understanding tolerances of these parts gave me valuable hands-on experiences. A lot of what we do in school is theoretical, so this was a nice change compared to some of my classmates. I was very satisfied with the co-op and the work environment was great."

FAQs

Where can I apply for co-op positions?

All of our co-op positions are listed on the Queen's University Job Board and our Careers Page.

Can I apply for more than one position?

Yes, you may apply to other positions if you feel they are suitable.

How can I apply for post-graduate full time positions?

At Mevotech, full-time positions are handled individually by our internal teams. Please check the company Careers page for more details.

Why is a past job position not available anymore?

Job positions at Mevotech are based on timelines and co-op program schedules. The position might be available again at a later date.
