2017-2007 Jeep Patriot

SUPREME™

CMS25188

Hardware included for complete install

Mevotech Supreme CMS25188 and CMS25189 are the engineered solution for extended service life front lower control arms on Jeep CUVs.

- Greaseable self-lubricating sintered bearings optimize ball joint performance
- Swivel dust boot creates stronger seal and reduces potential of twisting and tearing
- Enhanced stamping profile and cross-axis bushing improve component strength
- Superior part life and durability through innovative engineering

X Factor® LaborSaver®

MEVOTECH
PREMIUM PROGRAM

CMS25188/CMS25189 CONTROL ARMS

- Jeep CUV platforms utilize a front Macpherson suspension setup which features a singular front lower control arm with ball joint
- This setup may be considered as “high-travel” on these platforms. This travel may put additional stress on control arm components, such as the ball joint and bushing
- CMS25188 and CMS25189 are constructed with engineered enhancements which improve part service life and are a durable replacement alternative

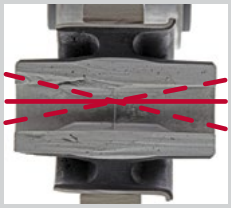

Originally Equipped Control Arm

BALL JOINT
Non-greaseable plastic bearing

CONTROL ARM BODY
Standard stamping profile

BUSHING
Voided design with limited range of movement

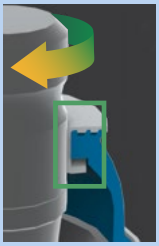

Mevotech’s Engineered Solution

ENHANCED BALL JOINT INTERNALS
Greaseable self-lubricating sintered bearings excel under high heat and high load conditions

REINFORCED CONSTRUCTION
Added bracing adds resistance against flex and twisting

NEW SWIVEL BOOT
Multi-lipped dust boot creates strong seal against steering knuckle, wicking away contaminants and prevents “pinching” of the boot as ball pin rotates

CROSS-AXIS BUSHING
Increased range of motion reduces stress on component as vehicle travels

SUPREME

Control Arms also feature:

- Greaseable self-lubricating sintered bearings
- Application-specific ball studs with added material
- Thicker forged construction
- Hardware and pre-installed components for quick fitting
