INNER TIE RODS

Ultimate Engineering for Working Vehicles

Purpose-built for hardworking commercial and fleet vehicles, TTX inner tie rods deliver the performance your vehicle demands. Featuring industry-leading, patented technology and precision-engineered components, TTX inner tie rods are built to excel in the toughest operating conditions. Plus, innovative Labor Saver™ designs, tools, and hardware boost bay efficiency and simplify installation.

Upgraded Bearings

Enhanced bearing material provides superior part strength, durability, and smoother steering

More Material

Larger diameter ball pins optimize pressure distribution for extended part life.

Corrosion Protection

Advanced Repel-TEK™ anti-corrosion formula shields the entire assembly and hardware from rust and contamination.

Labor Saver™ Complete Installs

Longer wrench flats, pre-applied thread locking compound and fastening hardware included for faster, easier installation.

Built to Last. Engineered to Perform

TTX inner tie rod ends are engineered for maximum strength and performance. Featuring enhanced bearing technology and Repel-TEK™ corrosion protection, they ensure smooth steering, superior durability, and reliable handling under the toughest conditions.

*varies by application

When Performance Matters, TTX Delivers

- 12+ Patented Technologies that set TTX apart
- Exclusive Designs & Time-Saving Advantages to maximize efficiency
- Purpose-Built Solutions for the demands of high-usage and commercial vehicles
