Increased Alignment Adjustability for 1988-2015 GM and Chevrolet Trucks, SUVs and Vans

Brand	Supreme	Product	Camber Bushing	Date	March 2021
Part Number(s)	MS50044				

A vehicle alignment which is out of specification may lead to excessive and premature tire wear, a feeling of an uneven/loose/shaky steering wheel and or the vehicle pulling to one side while in motion.

When performing an alignment on certain 1988-2015 GM and Chevrolet trucks, SUVs and vans, the OE adjustment range may be insufficient to attain correct alignment specifications.

To supplement the OE range, Mevotech Supreme offset front upper control arm bushing kit MS50044 provides an additional ±1° camber.

Additionally, to provide a cost-effective repair solution, MS50044 features a quantity of 2 bushings per package and may be used with the factory cam adjuster.
