Service Tips and Best Practices

Rear Stabilizer Bar Link Installation: 2020-2014 Tesla Model S

Brand	Supreme	Product	Stabilizer Bar Link	Date	July 2021
Part Number(s)	MS95810				

Installation Notes: General

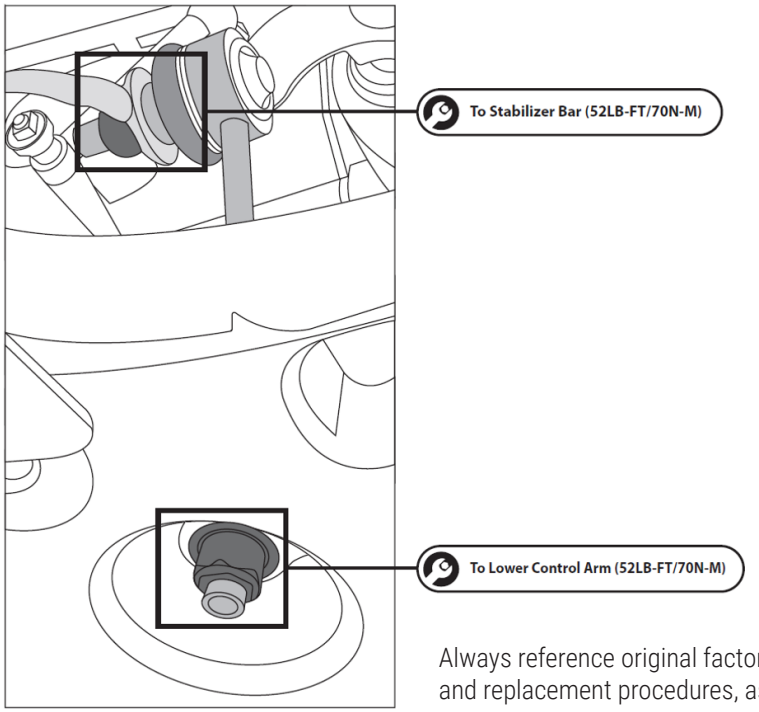

- Discard old nuts and bolts. Do not reuse hardware.
- Inspect all mating surfaces and replace mating components if damaged or out of specification conditions are found.
- Remove all rust, burrs and other contaminants from all mating surfaces.
- If the ball stud is broken, bent or loose, the mating components must be inspected and replaced if there is deformation, an out-of-round condition or damage.
- Use only a calibrated torque wrench for all fastening procedures at correct preloaded vehicle ride height.
- If vehicle is equipped with air suspension, deflate both front air bags before commencing repair.

Installation Notes: Stabilizer Bar Link to Steering Knuckle and Rear Lower Control arm

- **See Figure 1** for stabilizer bar link to stabilizer bar and rear lower control arm fastening values.

Figure 1.

Always reference original factory service manual for proper diagnostic, removal and replacement procedures, as well as all related specifications and values.
