Stabilizer Bar Link Stop Tab Identification

Brand	Original Grade/Supreme/TTX	Product	Stabilizer Bar Link	Date	July 2021
Part Number(s)	Various				

Some Mevotech stabilizer bar links feature an integrated stop tab. This is designed to prevent the ball stud from rotating as the nut is being fastened, reducing installation time.

When taking the new replacement component out of the box, the orientation of the stop tab may not match the orientation of the stop tab on the vehicle. In such a case, simply rotate the stop tab on the new component to match the correct orientation when installing. **See Figure 1**.

Figure 1. Stop tab (circled above) can be rotated to match correct orientation.

Always reference the original factory service manual for proper diagnostic, removal and replacement procedures and all related specifications and values.
