Volvo S60 and V70 (P2 Chassis) Front Lower Control Arm Identification

Brand	Supreme	Product	Control Arms	Date	August 2021
Part Number(s)	CMS10118/CMS10119/CMS70156/CMS70157				

Due to production variances at factory level, specifically manufacturing date and geographic location, the applications below may be equipped with one of two front lower control arm types. One type is constructed using forged aluminum, and the other is constructed using cast steel.

Application(s)

Volvo S60 (mid 2006 to 2007 assembly)
Volvo V70 (mid 2006 to 2007 assembly)

Although the usual catalogue qualifiers (date and VIN) apply in the majority of instances, due to the above-mentioned variances, it is recommended to visually identify which front lower control arm type the vehicle is equipped with when ordering replacements.
See Figures 1 and 2 for depiction of the different types.
