Mevotech Supreme rear stabilizer bar link MS50839 is engineered with an improved solid steel design. This adds rigidity and strength to the assembly and reduces flex and cycling while the vehicle is in motion. Additionally, the MS50839 is characterized by greaseable self-lubricating upper and lower sintered metal bearings for increased part service life and a solid 1-piece ball pin that increases bearing contact for optimized pressure distribution. New hardware is included for a complete install. **See Figure 1.**
