

Labor Saver™: 2019-2013 Ford Escape Front Lower Control Arm Bushing Bracket Hardware

| Brand | TTX | Product | Control Arm | Date | March 2023 |
|----------------|-------------------------|---------|-------------|------|------------|
| Part Number(s) | CTXMS401107/CTXMS401108 | | | | |

Due to road salt and other corrosion, the front lower control arm compliance bushing bracket fastening hardware often become seized. When removing the control arm for replacement, these bolts may strip, break and or otherwise develop an out of specification condition and should not be reused.

Mevotech TTX front lower control arm assemblies CTXMS401107 and CTXMS401108 for the below listed application include the compliance bushing bracket bolts and nuts, as part of the hardware package. This reduces installation time and provides an enhanced value repair option for the Professional Technician.

Application(s)

2019-2013 Ford Escape

Additionally, the control arm assemblies feature the greaseable self-lubricating patented Dynamic Control sintered bearing for increased part service life. All fastening hardware is anti-corrosion coated with the Repel-TEK™ formulation. **See Figure 1.**
