

Major Design Improvement- 2009-2018 Dodge RAM 1500 (4th Gen) Front Upper Control Arms

Brand	Supreme	Product	Control Arms	Date	November 2020
Part Number(s)	CMS251057/CMS251058/CTXMS25147/CTXMS25148				

The OEM front upper control arms for 2009-2018 Dodge RAM 1500 and 2019+ Dodge RAM 1500 Classic are characterized by a non-greaseable plastic bearing and hollow stamped steel design with a welded brace to compensate for twisting as the vehicle is in motion.

Mevotech Supreme and TTX replacement front upper control arms replace the inferior steel stamping found on the OEM design with an improved solid forged steel construction. This enhances stiffness and strength of the control arm assembly. Additionally, this reduces load on key control arm components and assists in preventing twisting and other changes in suspension geometry as the vehicle travels. See Figure 1 and 2.

Mevotech Supreme and TTX replacement front upper control arms also feature sintered metal bearings which are greaseable for increased service life. New hardware is provided for a complete install.

It is important to note that when ordering replacement arms, Mevotech Supreme and TTX front upper control arms may appear thicker and heavier but are direct fit replacements.
